

PROFESSIONAL PEST MANAGEMENT

TOMORROW'S TERMITE SOLUTION IS ALREADY HERE.

ALTRISSET is the most technically advanced termite solution available today which is why your pest controller has recommended it for you.

FOR LIFE UNINTERRUPTED™

 **Altriset**[®]
Termiticide

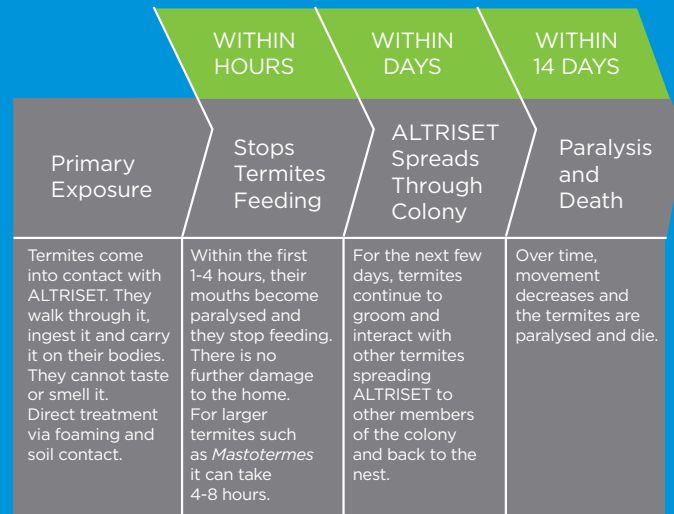

syngenta.

ALTRISSET provides a remarkable level of effectiveness and versatility and is safer for your family and pets.

ALTRISSET's advanced chemistry:

- ▶ Acts fast, stopping termites feeding within hours and causing further damage to your home
- ▶ Kills 100% of directly and indirectly exposed termites within 14 days
- ▶ Transfers from termite to termite, back to the nest
- ▶ Will protect your home for years
- ▶ Is exempt from poison scheduling, which is safer to you, your family and your pest controller

The ALTRISSET termite control timeline

Why ALTRISSET?

The most advanced termite treatment available

ALTRISSET is deadly to termites and works by locking termite jaws. Within hours of coming into contact with ALTRISSET, termites are no longer able to feed.

Smarter action

Not only does ALTRISSET stop termites eating your home, it provides ongoing protection too. Termites stay alive long enough to transfer ALTRISSET back to the nest and onto other termites. This destroys the colony in the area around your house. Within 14 days, 100% of termites exposed directly or indirectly to ALTRISSET will be killed. Because ALTRISSET is applied to the soil around your property, it safeguards your home for years to come.

Deadly to termites but safer for you

ALTRISSET is the only liquid termiticide that is exempt from the poison scheduling. This means pest controllers don't even have to wear protective gear to apply it and you don't need to leave your home on the day of treatment. ALTRISSET has very low toxicity to pets, birds, earthworms and even bees. Its proven safety means you can protect your home with peace of mind.

ALTRISSET. The new benchmark in termite control is safer for:

✓ Families

✓ Birds

✓ Dogs

✓ Honey bees

✓ Cats

✓ Use indoors or out
